

Food on Campus

A. Food quality, choice & healthy lifestyle

1. Enough vegetarian and vegan options?
2. Healthy vs fast food challenge?
3. Cultural diversity of food?

B. Sustainability, climate & resource use

1. Where do you see the biggest food waste problem on campus?
2. Do portion sizes lead to a lot of leftovers or waste?
3. Do you consider the climate impact when choosing your meals? Why or why not?

C. Campus as living agrifood system

1. Do students have enough opportunities to learn about food production outside the classroom (e.g. events, visits, projects)?
2. Which information about campus food production is missing or unclear for students?

D. Local food & student connection

1. Do students know where their food comes from?
2. Is local food perceived as affordable and relevant for students?
3. Do students see their food choices as supporting the local economy and environment?

E. Transformation & student agency

1. Do students currently have real influence on food related decisions on campus? Why or why not?
2. What supports or structures are missing for students to contribute to real change?
